

## Trieste Trasporti P.L.C.

### Region profile:

- **Urban agglomeration:** Trieste province, Friuli Venezia Giulia (Italy)
- **Area:** 6 municipalities, 212 km<sup>2</sup>
- **Inhabitants:** 234.345
- **Population density:** 1.105 inhabitants per km<sup>2</sup>

### Organisational profile:

- Largest public transport operator in charge of major planning activities in the pilot area Trieste and a number of peripheral areas;
- Provide and manage passenger public transport services in the province of Trieste, employing about 850 employees (of which 509 are drivers).

### Role in the project:

- **TT cooperates with VIU (WP2 leader)** by providing relevant data and information to develop innovative services, methods and tools, supporting scenario assessment and testing/implementing innovative solutions and tools;
- Public Transport provider.

### Activities in the project:

- Develop, test and implement innovative on-demand transport services based on smart/ITS-based ticketing solutions; 
- Support cross-border (e.g. with Slovenia) activities to further enhance regional mobility and promote regional mobility and transnational agreements; 
- Provide data and support the testing and validation activities of innovative services and the overall assessment; 
- Provide a demonstration area to organize and operate a rural door to door service.
