Acronym: Bridge2EastCE

Project ID: CE0301259

	Short term (2026–early 2028)	**Medium term** (2028–2030)	**Long term** (2031–2035)
1) Migration and labour market balance	Joint migration and labour market pilot; establishment of a migration monitoring network. Expected impact: Comparable information and tested ITPC tools.	Development of regional labour market information exchange, training and skills-matching mechanisms. Expected impact: More effective labour market coordination.	Sustained operation of the migration monitoring network and expansion of joint planning. Expected impact: Reduced labour shortages and integration difficulties.
2) Territorial development and institutional coordination	Development of ITPC methodology, joint planning procedures and stakeholder consultations. Expected impact: More consistent planning methodology.	Support for the uptake of the joint ITPC Strategy and four country-specific Action Plans. Expected impact: Better coordination of national and regional development decisions.	Permanent macro-regional planning cooperation and regular strategic reviews. Expected impact: Sustained, institutionalised cooperation.
3) Public services and social resilience	Joint assessment of the impacts of migration and demographic change on public services. Expected impact: More accurately identified service gaps.	Preparation of joint solutions for service planning, capacity sharing and digital access. Expected impact: More targeted capacity and resource planning.	Support for more resilient regional service systems adapting to demographic changes. Expected impact: Improved accessibility and adaptability of public services.
4) Transport and cross-border connections	Mapping mobility and logistics barriers and prioritising development needs. Expected impact: Jointly identified infrastructure priorities.	Development of joint transport, intermodal and border-crossing concepts. Expected impact: Better coordinated development plans.	Strengthening the region's integration into European and Ukrainian economic corridors. Expected impact: Improved regional accessibility and economic connectivity.
