Interreg CENTRAL EUROPE

Co-funded by the European Union

ZEB4ZEN

ZEB4ZEN
Zero energy buildings for zero energy neighbourhoods

As part of the project, a pilot action was carried out at 11 Ormiańska Street in Zamość's Old Town to improve the tenement house's energy efficiency through thermal insulation, while preserving its historic and architectural value. The project facilitated the testing of contemporary thermal modernisation solutions in historic structures, generating knowledge and experience to inform future interventions in historic city centres.

This project is supported by the Interreg CENTRAL EUROPE Programme with co-financing from the European Regional Development Fund.
