Children's workshop

A children's workshop was organized on March 22nd, 2017 in Zagreb city Library Medveščak 2, for the children from Elementary School Tin Ujević.

The following experiments were conducted:

- water cycle experiment
- cold and warm water experiment
- capillarity experiment
- surface tension of water experiment
- groundwater experiment
- soil erosion experiment

When the experiments finished, the children participated in the quiz containing all the important information that they've learned on the workshop. After the quiz they had their last task, to make a poster of the workshop and the project topics. Around 30 children participated. As the main cause of this workshop was to present the children PROLINE-CE project and build awareness of land use management and water resource protection. Also to inspire young students interest in science and ecology through fun and educational experiments.

The workshop was advertised on the official site of Zagreb libraries as depicted on the screenshot below.
