

OUTPUT FACT SHEET

Strategies and action plans

Version 2

Project index number and acronym	CE1519 CHAIN REACTIONS
Output number and title	O.T4.3 (4/5) Thematic Transnational Exploitation Plan and Open Collaboration Space for Health sector
Responsible partner (PP name and number)	Camera di Commerciale Industria Artigianato Agricoltura Padova (CCIAA); PP3 Košice IT Valley, z.p.o. (KEITVA); PP8
Project website	https://www.interreg-central.eu/Content.Node/CHAINREACTIONS.html
Delivery date	March 31, 2022

Summary description of the strategy/action plan (developed and/or implemented), explaining its main objectives and transnational added value

The final output within the Health sector was the preparation of the Memorandum of Understanding between the project partner duo, to ensure future cooperation between the regions, which will be coordinated by both partners:

- Camera di Commerciale Industria Artigianato Agricoltura Padova (CCIAA); PP3
- Košice IT Valley, z.p.o. (KEITVA); PP8

This was achieved by preparing the Transregional exploitation plan and determining the Transnational open space for collaboration between both regions.

The key objective of the Memorandum is to ensure future collaboration in the post project period, where interested parties will keep coordinating their respective networks or clusters looking for synergies, especially in the implementation of the activities agreed upon in the Transnational Innovation Agenda.

The Memorandum was proposed within the project consortium and further tailored to suit the specifically planned activities of the Health sector and the possibilities of both partners to commit to future efforts.

The memorandum was signed before the closure of the project (see O.T4.3-4).

NUTS region(s) concerned by the strategy/action plan (relevant NUTS level)

NUTS regions on NUTS2 level that are involved in the implementation of the roadmap are: Veneto (ITH3) in Italy, and Śląskie (PL22) in Poland.

Expected impact and benefits of the strategy/action plan for the concerned territories and target groups

The final output, O.T4.3 is based on the Transregional exploitation plan (TEP) and Transnational open space (TOS) for collaboration between both regions. TOS consist of stakeholders of both involved regions, committing to continuation of the activities set within the project. Therefore, the memorandum signed between both regions will ensure the continuation of activities such as the competence center and the transnational observatory.

Also, both regions will benefit from the developed and tested transnational business model for medical devices, which will be implemented within the future activities of both regions.

Sustainability of the developed and/or implemented strategy/action plan and its transferability to other territories and stakeholders

The sustainability of the output is self-evident in the signed Memorandum, in which both partners commit to continuation of the cooperation between regions that will contribute to further implementation of agreed activities.

Based upon the methodology for preparation of the activities and committing to their achievement in the post project period can be achieved in various regions, which follow the preparatory methodology. The beneficiaries of the Memorandum are the stakeholders of both partners, which will through coordination of both partners be able to cooperate in joint activities.

For future reference, the key to success is good preliminary work, where you already identify regional challenges and feasible possibilities, before you start connecting transnationally in order to reach the most optimal match.
