

OUTPUT FACT SHEET

Strategies and action plans

Version 2

Project index number and acronym	CE1519 CHAIN REACTIONS
Output number and title	O.T4.3 (5/5) Thematic Transnational Exploitation Plan and Open Collaboration Space for Bioeconomy sector
Responsible partner (PP name and number)	Wroclaw Technology Park (WTP); PP7 Bioeconomy Cluster (BEC); PP9
Project website	https://www.interreg-central.eu/Content.Node/CHAINREACTIONS.html
Delivery date	March 31, 2022

Summary description of the strategy/action plan (developed and/or implemented), explaining its main objectives and transnational added value

The final output within the Energy and Environment sector was the preparation of the Memorandum of Understanding between the project partner duo, to ensure future cooperation between the regions, which will be coordinated by both partners:

- Wroclaw Technology Park (WTP); PP7
- Bioeconomy Cluster (BEC); PP9

This was achieved by preparing the Transregional exploitation plan and determining the Transnational open space for collaboration between both regions.

The key objective of the Memorandum is to ensure future collaboration in the post project period, where interested parties will keep coordinating their respective networks looking for synergies, especially in the implementation of the activities agreed upon in the Transnational Innovation Agenda.

The Memorandum was proposed within the project consortium and further tailored to suit the specifically planned activities of the Energy and Environment sector and the possibilities of both partners to commit to future efforts.

The memorandum was signed before the closure of the project (see O.T4.3-5).

NUTS region(s) concerned by the strategy/action plan (relevant NUTS level)

NUTS regions on NUTS2 level that are concerned in the implementation of the memorandum are:
Dolnośląskie (PL51) in Poland, and
Západné Slovensko (SK02) in Slovakia.

Expected impact and benefits of the strategy/action plan for the concerned territories and target groups

The final output, O.T4.3 is based on the Transregional exploitation plan (TEP) and Transnational open space (TOS) for collaboration between both regions. TEP will impact the bioeconomy sector within the Slovak region of Nitra, where a new DIH was established and will foster transnational innovation activity within the TIN.

Such an organization will also allow for innovative funding approach, where the DIH itself is also identifying financial opportunities.

Apart from the DIH in Nitra, other stakeholders of DIH will have direct benefit by developing and implementing new technologies and optimizing existing production in bioeconomy sector.

The partner WTP will also enlarge the collaboration of their network and achieve progress.

The activities are planned to start in 2022, thus, the impact of this output is the continued commitment to implementation of agreed activities to reduce the environmental impact by optimization of public e-transport.

Sustainability of the developed and/or implemented strategy/action plan and its transferability to other territories and stakeholders

The sustainability of the output is self-evident in the signed Memorandum, in which both partners commit to continuation of the cooperation between regions that will contribute to further implementation of agreed activities.

Based upon the methodology for preparation of the activities and committing to their achievement in the post project period can be achieved in various regions, which follow the preparatory methodology. The beneficiaries of the Memorandum are the stakeholders of both partners (the bioeconomy network in Nitra region with support of WTP and their HUB), which will through coordination of both partners be able to cooperate in joint activities.

For future reference, the key to success is good preliminary work, where you already identify regional challenges and feasible possibilities, before you start connecting transnationally in order to reach the most optimal match.
