CROSS-BORDER ECOSYSTEM FOR INDUSTRY 4.0

ENTER
KOPRIVNICA

FCB Fondazione Giacomo Brodolini

marr Małopolska Agencja Rozwoju Regionalnego SA

Our overall objective

The 4th industrial revolution is inevitable and will affect all industrial sectors. The impact of Industry 4.0 depends on readiness of regions to respond, accept and adopt the changes.

ECOS4IN project supports the sustainable cooperation of actors of innovation systems to enhance the regional innovation capacities in Central Europe to promote Industry 4.0 processes.

Expected results

The project starts with an **analysis of the current situation of Industry 4.0** implementation and creating **a tool "ECOS4IN knowledge base"**, which will be used in pilot testing at information hubs to provide the knowledge to the target groups to raise awareness about Industry 4.0.

The information gained by analysis will be used in the process of describing the **ecosystem model** according to the regional conditions and context. The last phase of project represents the **development of action plans** in all partner regions. This will ensure the sustainability of project results by providing the relevant material for forthcoming revisions of regional innovation strategies.
