WHY IS COOPERATION CENTRAL FOR SMARTER EUROPE?

Cooperation is central to make central Europe more innovative and competitive. Our projects work together to answer to key socio-economic challenges and needs related to smart growth. They support effective investments in research, innovation and education by strengthening the links between various innovation actors and by improving their capacities and competences for economic and social innovation.

WHAT WE ACHIEVE

PILOTS
CERlecon piloted a mentoring scheme that helps start-ups to grow. Seven regional Playparks located in Bratislava, Brno, Krakow, Rijeka, Stuttgart, Venice and Vienna established new, creative innovation ecosystems.

STRATEGIES
Health systems need go digital to offer better care. DigitalLIFE4CE supports policy makers in choosing the best technological solution for their region with their transnational strategy and action plan on digital healthcare innovation potentials.

TOOLS
For a shift towards biodegradable packaging, the producers need more knowledge. BIOCOMPACK-CE audit tool helps them to assess their readiness to introduce biodegradable plastics and to understand their packaging options.
