Output factsheet: Trainings

Version 1

Project index number and acronym	CE933 RURES
Lead partner	Aufbauwerk Region Leipzig GmbH
Output number and title	O.T3.3
Responsible partner (PP name and number)	Public Institution for the Development of the Međimurje County REDEA
Project website	https://www.interreg-central.eu/Content.Node/RURES.html
Delivery date	05.2020.

Summary description of the implemented training measure(s), explaining the specific goal(s) and target groups

Public Institution REDEA, together with PP9 - MENEА, organized first training seminar for their stakeholders. The training was organized on May 14th 2020. Due to the current situation with COVID-19, the training was unable to be held in person, so project partners organized an online training seminar through virtual platform - Skype. The purpose for organization of such an event was to present finished value calculator, because information generated through calculator can be used as basic knowledge for the suitability of the installation of RES measures on public/private buildings. An invitation was sent primarily to members of Local Support Groups who has been involved and informed about value calculator from the beginning of the project. Nevertheless, invitation was also sent to regional public authorities, representatives of municipalities and cities in Međimurje County, representatives of non-governmental and non-for-profit organizations that operate in Međimurje. In total, we managed to gather 14 participants from different target groups.

The main goal for organizing this training seminar was to educate representatives of respective public institutions, governments and also general public about benefits of newly established value calculator. Also, one of the goals was to approach RES measures and EE measures to our target group because we think that they are the best way to transfer knowledge about those measures to general public.

NUTS region(s) where training(s) have been conducted (relevant NUTS level)

Since the situation with the COVID-19 wasn't favorable, we organized our training seminar through virtual platform - Skype. But, since almost all participants were from the same NUTS region, we can say that training have been conducted in Nuts3 region: HR046, Međimurska županija

Expected impact and benefits of the trainings for the concerned territories and target groups

The biggest benefits that every interested stakeholder who participated at the training can get from value calculator are specific information, examples of good practice and possible RES measures at one place, due to the associated characteristics of individual building.

The long-term effect of those trainings is reflected in the fact that all participants, after the conducted "training seminar" will have the knowledge and skills to independently analyze effectiveness and energy efficiency of certain measures of renewable energy. Also, they'll acquire skills to further educate all interested stakeholders and this is the point of the value calculator.

Sustainability of the training(s) and developed training material(s) and their transferability to other territories and stakeholders

Within this project, we as project partners can assure sustainability of trainings through the whole period of the project duration. After the project end, we won't organize any more training, but the one thing that we can be sure regarding sustainability is that every participant has our contact information to feel free to ask us anything about value calculator. We'll inform our target groups every time we have some news about project RURES in total, not just value calculator. Also, since our training was recorded, we can send them this video anytime so that they can have it as a reminder and instruction how to use value calculator.

Our target group members were selected specifically because our target group members were representatives of municipalities, towns and regions, representatives of public services and so on. So we can be sure that our participants will transfer their knowledge gained through training seminars to other stakeholders and territories.

Lessons learned from the development and implementation of training measures and added value of transnational cooperation

The one lesson that we can learn from the development and implementation of training is that no matter the situation, there is always some way to transfer knowledge to others.

References to relevant deliverables and web-links If applicable, pictures or images to be provided as annex

Since the training was organized through the virtual platform, we don't have pictures of held training. News about organization of Croatian's first training was published on RURES's web page (<https://www.interreg-central.eu/Content.Node/RURES.html>)

Attendance list from first training seminar you can find below.
