
Kick-off Meeting

On 28th and 29th September the RegiaMobil project partners met in Dresden. The meeting was organized by the lead partner, the Saxony State Ministry of Regional Development. It was the second meeting since the beginning of the project. The first meeting was held completely online. Unfortunately, due to current travel restrictions, this time also not all partners could attend the meeting. Therefore, a hybrid meeting was held. Five of ten partners came to Dresden, but partners who could not physically participate in the meeting were connected by videoconference. Also the associate partner, Ministerium für Landesentwicklung und Verkehr des Landes Sachsen-Anhalt (MLV), who was responsible for the preparation package, took part in the meeting. During the meeting it was discussed what the partners, despite the difficult situation with COVID 19, have achieved so far, as well as the difficulties they have to face in the current situation. Representatives of the steering group were also elected and they held their first meeting.
