

2ND TRAINING ON MANAGEMENT PLAN DEVELOPMENT

Output factsheet: Trainings

Project index number and acronym	CE32 AMIIGA
Lead partner	Central Mining Institute
Output number and title	O.T.3.2 Training of practitioners
Responsible partner (PP name and number)	Landeshauptstadt Stuttgart PP3
Project website	http://interreg-central.eu/Content.Node/AMIIGA.html
Delivery date	08.2019

Summary description of the implemented training measure(s), explaining the specific goal(s) and target groups

2nd training on management plan was held on 10. October 2017 in Milan, Italy. Altogether 32 participants were trained.

Effective training activities were conducted in order to provide the necessary information and to engage actively participants in the training. Firstly, a trainer demonstrated his expertise in management plan development and provided information about the work plan and working in groups. Secondly, the participants were separated in the three groups to discuss thoroughly their case studies, examples and problem solving issues. Group discussions allowed interaction with other participants that has resulted in the transnational experience and knowledge. The presented training helped participants to establish the draft of the groundwater management plan in seven different pilot areas. The specific goal of the training was to provide to participants the necessary knowledge and practical examples on establishing their specific management plan. The participants were assisted in (i) defining necessary element of their management plan, (ii) setting up targets to be achieved (FUA) and (iii) defining necessary steps to be taken in the upcoming period.

The project and associated partners were targeted groups involved in the training, since they are responsible for the development and application of the management plan.

NUTS region(s) where training(s) have been conducted (relevant NUTS level)

PL22A, Katowicki; PL22B, Sosnowiecki
DE111, Stuttgart, Stadtkreis
CZ052, Kralovehradecky kraj; CZ051, Liberecky kraj
ITC4C, Milano; ITH52, Parma
SI021, Osrednjeslovenska
HR04, Kontinentalna Hrvatska; HR033, Zadarska zupanija

Expected impact and benefits of the trainings for the concerned territories and target groups

The presented guiding questions initiated lively internal discussions in the attending partner groups. However, finally they all managed to agree on their major issues and action priorities, predominant targets and associated measures. This internal reflection process was even strengthened by a broader view in the final discussion when observing the situation in other pilot areas and learning about other specific ways to proceed. Despite the wide variety of situations there are specific similarities concerning essential challenges and obstacles. Reflecting these challenges in a common discussion enables the partners to learn from each other and facilitates the further working process. It is to be expected that the training's guidance will enable all partners to follow a targeted approach and do some major steps in the upcoming working period.

Sustainability of the training(s) and developed training material(s) and their transferability to other territories and stakeholders

Although the Stuttgart example gives valuable guidance, there is no general way to proceed in establishing a groundwater management plan. This is a clear result of the AMIIGA process up to now. Seven specific, individual approaches will show and be documented as a result of AMIIGA. They will show seven different framework conditions concerning legal framework, state of knowledge, geology, contamination, etc. but also similarities in upcoming problems and a description of specific ways how they were tackled. Due to this variety of conditions and approaches, AMIIGA results will serve as a valuable best practise example for many other European municipalities.

Lessons learned from the development and implementation of training measures and added value of transnational cooperation

Applied training measures were very efficient and successful in reaching the set goals of this training. Combined measures of lecture style and interactive approach gave satisfactory results. The participants covering seven pilot areas and originating from six European countries were discussing all case studies and were jointly suggesting solutions for each of the pilot area. The participants exchanged experiences from different regions and countries, which will improve their working process in future.
