

D.T2.1.4 COMPANY INFOSHEET

HBLFA Francisco Josephinum

Version 1

HBLFA Francisco Josephinum Wieselburg

The Francisco Josephinum was founded 1869 in Mödling. Since 1934 the institute is located in castle Weinzierl in Wieselburg. The FJ is divided into two main sections. The school and the Research & Testing department. The Research & Testing branch is once again divided into the Department of Food and Biotechnology (LMTZ), the Biomass and Agriculture engineering (BLT) and the Josephinum Research.

So the FJ has many different tasks. The school teaches the students and raise them to young adults. There are 4 specializations that can be chosen: General Agriculture, Agricultural Engineering, Food- and Biotechnology or the Informationtechnology and Agriculture. Additionally to the school, there is a Campus of the University of Applied Science Wiener Neustadt located in the castle. There students can studie Agricultural Technology and Digital Farming.

Transform4.0

The Department of Food- and Biotechnology works on technologies of processing milk and Non-Milk products. Also the processing of delicatessen and sweets is under investigation.

The Biomass and Agricultural engineering has several tasks. The main works of the Biomasse sections are the accredited testing of Biomass furnaces and the analysis of fuels & lubricants. The Agricultural engineering department is working to improve machines, test new technologies and also research on new devices.

The Josephinum Research is a branch, which is working close with private companies. It offers expertise and experience on all kinds of engineering in agriculture. Some key areas are image analysis, training of artificial intelligences and robotics. With connections, national and international, this department is the right choice if a company has an idea but does not know how to approach it.

There are about 200 employees working for the FJ. Consisting of teachers, researchers and trainees.
