PROCAREFUL

PROactive CARE For Users Life

Digitalizing home care services to support people in need of care in the Central Europe area

ABOUT PROCAREFUL PROJECT

Vulnerable people wish to be **taken care** of in their **homes**, but often lack the necessary support for independent living.

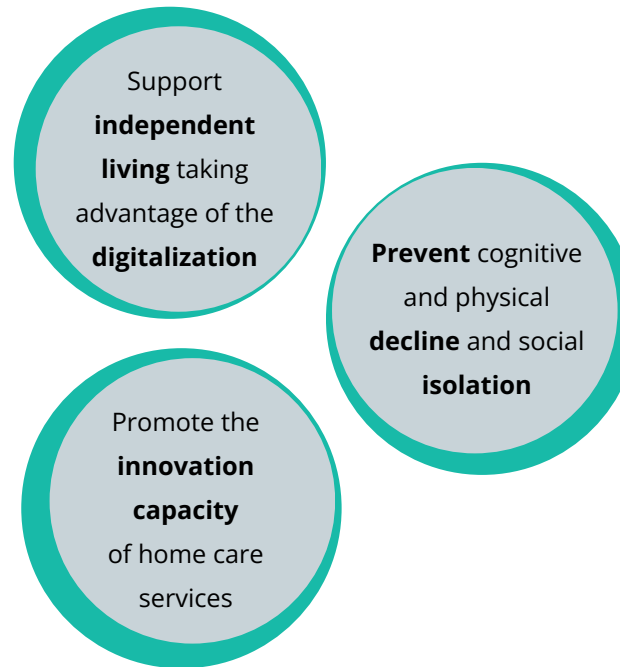

The PROCAREFUL project aims to improve home care by developing a **hybrid model** that combines face-to-face care with remote support based on artificial intelligence.

The PROCAREFUL model will be tested in **five regions**.

PROCAREFUL OBJECTIVES

The PROCAREFUL model for hybrid care intends to:

TARGETS

- People in need of care
- Informal Carers
- Formal Carers
- Policy Makers

PILOT SITES

PROCAREFUL ACTIVITIES

To achieve its objectives, PROCAREFUL will implement different actions:

Mapping of existing solutions

Co-design with key stakeholders

Development of **ICT Platform** & **Pilot actions**

Creation of a **Policy Strategy** for Model Adoption
