

# Supplying food in a more sustainable way

Alternative food networks seek to transform food supplies by connecting ethical producers and consumers more directly. Systemic policies to support such networks are widely missing in central Europe and it is time to change this. The FOOD4CE project establishes local and transnational hubs for the food and logistics sectors, in which they can exchange good practices and take up innovative technologies. The hubs will be integrated into the European network of logistics competence centres.

## COUNTRIES & REGIONS

AUSTRIA	Wien
BELGIUM (not on map)	Région de Bruxelles-Capitale/ Brussels Hoofdstedelijk Gewest
HUNGARY	Pest
ITALY	Emilia-Romagna
POLAND	Wielkopolskie
SLOVENIA	Vzhodna Slovenija
