

## Putting freight on rail

To reduce carbon emissions, more goods need to be moved by rail. But currently, most freight is still transported on central Europe's roads due to rail infrastructure gaps that reduce competitiveness. The Rail4Regions project helps transport planners to integrate regional rail lines into European freight networks. The partners develop solutions to optimise regional rail lines and access points and create action plans to encourage the uptake of their solutions in regional development plans.

### COUNTRIES & REGIONS

AUSTRIA	Kärnten
CROATIA	Sjeverna Hrvatska
CZECHIA	Jihovýchod   Praha
GERMANY	Thüringen
HUNGARY	Budapest
ITALY	Liguria   Piemonte
POLAND	Małopolskie
SLOVAKIA	Stredné Slovensko
SLOVENIA	Vzhodna Slovenija
