CREDIT4CE

Welcome to the CREDIT4CE project E-Newsletter 1!

In this newsletter, catch up on the latest developments of CREDIT4CE (Carbon Reduction & Innovative Transformation), a project supported by the Interreg Central Europe Programme 2021-2027, which aims to strengthen the capacity of the CE region to meet its climate targets by helping manufacturing SMEs to decarbonise, enhancing the region's technology transfer capacities and accelerating the development and adoption of innovative technologies needed for Net Zero.

Follow us on X and LinkedIn to keep up to date with our latest activities.

We wish you an exciting read to discover the CREDIT4CE project.

PROJECT OVERVIEW

The CREDIT4CE (Carbon Reduction & Innovative Transformation) project is part of the Smart priority of Interreg Central Europe, which aims to promote innovation and cooperation in Central Europe. The project supports SMEs in their transition to a sustainable future by promoting advanced technological solutions and facilitating cross-regional collaboration to address global challenges.

Small and medium enterprises account for nearly a third of carbon emissions, but many regions lack the resources to support their decarbonisation efforts. CREDIT4CE is committed to developing support capacities for SMEs and regions, driving the green transition forward.

The partners train them on technology transfer and speed up the development and uptake of innovative technologies needed for "net zero". They design a new framework for green-tech innovators, which consists of a set of interventions for technology transfer and a public/private support model for green tech startups. The model will speed up the transfer of cutting-edge tech from lab to market and scale up green solutions to create new business opportunities.

PROJECT DURATION

Start date: 06.2024

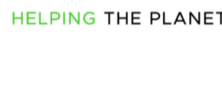

End date: 11.2026

10 PROJECT PARTNERS

CONFINDUSTRIA EMILIA
AREA CENTRO
Le imprese di Bologna,
Ferrara e Modena

Primorski
Tehnološki
Park.

NEWS & EVENTS

For detailed information about all the news of the CREDIT4CE project click [HERE](#).

05/07/2024

CREDIT4CE Kick-off Meeting

On the 3rd and 4th July 2024, the first CREDIT4CE Consortium Meeting was held in Bratislava, Slovakia

08/07/2024

CREDIT4CE is online!

We officially launched the project's social media channels.

29/11/2024

Carbon Footprint Calculator

CREDIT4CE launches Carbon Footprint Calculator to drive green transition.

21/03/2025

2nd Consortium meeting in Zagreb, Croatia

On 20 and 21 March 2025, CREDIT4CE project partners met in Zagreb, Croatia, for the second in-person Consortium meeting, hosted by REGEA and ZICER.

ACHIEVEMENTS

In this section you can find and download all the public deliverables and documents of CREDIT4CE released:

DELIVERABLES

- [Decarbonisation of Manufacturing SMEs in Central Europe Report](#)

COMING SOON

In the coming months, the project partners will continue to work on the creation and publication of:

- [catalogue of a decarbonisation solution providers](#) that will list solutions available on the market to assist local SMEs in accessing innovative technologies;
- [training sessions and materials to guide SMEs](#) to replicate existing best practices and access green financing opportunities.
