7. HUNGARY	22
8. SLOVAKIA	24

1. Introduction

In this document, we present the <u>catalogue of concrete actions</u> made by project partners according to their regional perspectives and needs and detected issues in specific sectors. Concrete actions are made to address the 8 priority intervention areas; we summarized the most influential and frequently used priority intervention areas for all project partners and partner countries. In the upcoming phase of creating CURIOST Action Plan, together with final results of other activities, suggestions for concrete actions will be refined and incorporated in Action Plan.

8 priority intervention areas which can bring meaningful change to transformation to circular economy and sustainable production are:

- 1. Support for training of qualified personnel and SMEs in sustainable product development, business models and circular product design
- 2. Engagement in European/regionally funded projects, facilitate the access for SMEs to EU funding to boost investments for circular transformation
- 3. Cross regional cooperation platforms collaborative platforms and industry networks for knowledge sharing and best practices exchange
- 4. Harmonization and legislative clarifications and standardization of product sustainability assessment methodologies
- 5. Market support and strengthening the innovation capacities of companies
- 6. Raising awareness and education, advocacy activities and providing expertise

7. Focus on supply chain sustainability and raw materials sourcing

8. Integration of digital tools and AI to endorse the transformation to circular economy

Concrete actions proposed are listed below per partner country:

2. AUSTRIA
