

Greening Regional Freight Transport in FUAs

Maribor

Strict delivery regulations in the pedestrian zone

High demand for off-hour deliveries

Restricted access for all vehicles (including electric vehicles) outside delivery hours

Fragmented delivery operations

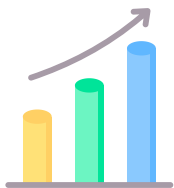

Insufficient delivery efficiency

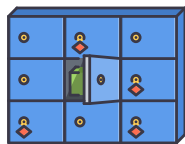

Micro-Hub

Consolidation of deliveries through a Micro-Hub using zero-emission vehicles for last mile delivery adapted for urban logistics.

**FLEXIBLE SOLUTION TESTED FOR
FUTURE SUSTAINABLE MODELS**

SYNERGY WITH PARCEL LOCKERS

Analysis of logistics operations and freight flows in Maribor FUA.

Identification of several potential micro hub locations.

Identification of most promising micro-hub solution.

Co-design with stakeholders through Freight Quality Partnership.

Micro-hub with renders and visualizations in different layouts.
