

D4PACKtool

Decision-support tool for sustainable packaging transition in the food industry

D4PACKtool helps food companies – especially SMEs in the dairy, meat, and fresh produce sectors – assess the risks of transitioning to new, more sustainable packaging.

Through a guided online questionnaire, companies receive a personalised evaluation of packaging alternatives and actionable recommendations.

Multi-use

Usable multiple times, including for different products

Free of charge

Fully free, no subscription required

SME-focused

Designed for dairy, meat & fresh produce

HOW IT WORKS

1 Technical assessment – 18 questions

Identifies up to 3 alternative packaging solutions with a compatibility percentage based on the company's product and process characteristics.

2 Risk analysis – 20 questions

In-depth evaluation of economic, regulatory, environmental, social, and technical risks linked to the selected packaging solution.

3 Personalised report

Automatically generated risk assessment report with tailored feedback, operational recommendations, and full impact analysis.

RISK DIMENSIONS COVERED

Economic

Regulatory

Environmental

Social

Technical

AVAILABLE IN SIX LANGUAGES

English, Czech, Hungarian, Italian, Polish, Slovenian
