

RehAllianCE

SME Success Story

RehAllianCE - Strengthening the innovation capacity of SMEs in the rehabilitation sector

REVOLUTIONISING REHABILITATION THROUGH DIGITAL INNOVATION AND CLINICAL EXPERTISE

Company: DIGITALREHAB SRL

digital
rehab

The Challenge

DigitalRehab aimed to validate and enhance its sensor-based rehabilitation solution through real-world use cases, clinical feedback, and advanced data integration. The company needed support in usability testing, clinical validation, and integration of additional sensing technologies.

The RehAllianCE Support

Through the services provided by RehAlliance, a comprehensive evaluation was conducted, including a technical assessment, a domain-specific focus group involving professionals directly engaged in rehabilitation practice, and a user experience evaluation. The support contributed to improving the solution's performance, usability, and clinical relevance, while highlighting technical challenges related to data integration and system validation.

SME Testimonial

The RehAllianCE program gave us a detailed insight into our product which will lead us to significant improvements.
