D 1.3.1: Catalogue of Measures

Date 12 2025

DELIVERABLE - FACT SHEET

Catalogue of Measures factsheet for Deliverable 1.3.1. belonging to Output O 1.2 - Guidelines on “Schools against Food Waste”	
Project acronym	FoodCIRCUS
Project Partner(s) (name and number)	LP BOKU University of Natural Resources and Life Sciences, Vienna PP2 UPWr Wrocław University of Environmental and Life Sciences PP4 VSE Praha Prague University of Economics and Business PP5 ZJ Save the Food PP7 UMW Municipality of Wrocław PP8 UVMB University of Veterinary Medicine Budapest PP9 UNIBO University of Bologna, Department of Agricultural and Food Sciences (Lead WP1)
Deliverable title (as indicated in AF + related deliverable number)	D.1.3.1. Catalogue of measures
Location, country	Italy, Austria, Czech Republic, Hungary, Poland
Deliverable aim	The catalogue of measures will give a transparent overview on which concrete measures will be implemented where and how they are connected to pilot actions.
Expected solution derived from the Deliverable	D.1.3.1. is expected to contribute to the development of the Guidelines on “Schools against Food Waste” (O.1.2). The Catalogue of Measures is tightly connected to the development and implementation of PAs, whose data and subsequent analyses will help spot best practices and solutions to tackle the issue of FW in Central European Countries.
Deliverable summary including technical description incl what has been achieved so far and implementation progress	The <i>Catalogue of Measures</i> provides a structured, science-based overview of the planned interventions on Food Waste reduction and prevention, as implemented within the foodCIRCUS project across the five European countries considered (Austria, Czech Republic, Hungary, Italy, and Poland). The listed interventions are linked to the selected Pilot Actions (PA) categories, being: 1) Awareness Raising (PREV1) 2) Food Optimisation (PREV2) 3) Nudging Strategies (PREV3) 4) Redistribution (PREV4) Each Project Partner has selected a minimum of two interventions to be implemented in the selected schools, belonging to at least 2 different categories from the above list. The measures have been mapped across the partner countries and, within D.1.3.1. they have

	been framed through the Behaviour Change Wheel (BCW) Theoretical Framework, helping to highlight how each intervention addresses different dimensions and drivers of FW. The Deliverable, therefore, transparently documents the concrete measures that are currently/will soon be implemented within the Pilot Actions carried across the different European Countries, including information on where they will take place, and how they are connected to the overall pilot activities. More precisely, • Austria is implementing food optimisation, nudging and redistribution measures • Czech Republic will implement redistribution, awareness raising and nudging measures • Hungary is implementing awareness raising and redistribution measures • Italy has put in place nudging and awareness raising measures • Poland has put in place food optimization, nudging and awareness raising measures.
PA timing (start and end date)	Since D.1.3.1 is tightly linked to D.1.3.2. “Concept for Pilot Actions”, the timing refers to the Pilot Actions (PA) being it the factual framework where the selected measures - listed here above- will be implemented. 05/2025 - 11/2025
Stakeholders involved	– LP BOKU University of Natural Resources and Life Sciences, Vienna – LEAD WP1 UNIBO University of Bologna, Department of Agricultural and Food Sciences – UPWr Wrocław University of Environmental and Life Sciences – VSE Praha Prague University of Economics and Business – ZJ Save the Food – UMW Municipality of Wrocław – UVMB University of Veterinary Medicine Budapest Other stakeholders involved include catering companies, school management, teachers, parents, students, municipalities, health authorities, regional authorities, NGOs, charitable organisations, and other relevant stakeholders.
Joint cooperation dimension (within the partnership)	D.1.3.1. is the result of exchange of ideas, knowledge and previous experiences and results among the different Partners and Institutions involved in the foodCIRCUS Project. Each selected intervention was chosen by the Project Partner and discussed with the others within the framework of monthly Work Package 1 (WP1) meetings, held online through Teams Platform. Reciprocal feedback and interaction was crucial for the effective and scientifically grounded development of each intervention and PA. Since Central European Countries often face similar challenges when it comes to FW and food education in school canteens’ environments, collaboration has been sought to share experience and best practices, allowing all Project Partner to

	collectively address common issues more effectively. The selected interventions were the result of leveraging on common expertise.
