PILOT ACTION - FACT SHEET

Pilot action factsheet for Output 01.1 - (Pilot actions on food waste prevention and redistribution)	
Project acronym	foodCIRCUS
Project Partner (name and number)	LP BOKU University of Natural Resources and Life Sciences, Vienna PP2 UPWr Wrocław University of Environmental and Life Sciences PP4 VSE Praha Prague University of Economics and Business PP5 ZJ Save the Food PP7 UMW Municipality of Wrocław PP8 UVMB University of Veterinary Medicine Budapest PP9 UNIBO University of Bologna, Department of Agricultural and Food Sciences (Lead WP1)
Pilot action (PA) title (as indicated in AF + related deliverable number)	PREV1_Awareness raising PREV2_Food optimisation: PREV3_Nudging strategies PREV4_Redistribution
Location, country	AT, CZ, HU, IT, PL
PA aim	to reduce the food waste generated by schools/kindergartens
Expected solution derived from PA	Guidelines on “School against Food Waste” to be used in future
PA concept/summary including technical description	The Deliverable 1.3.2 “Concept for Pilot Actions” presents the framework for the development of food waste prevention interventions in schools and kindergartens, within the scope of Activity 1.3 - Development of food waste prevention interventions for schools of Work Package 1 (Food Waste Prevention) of the Interreg foodCIRCUS project. Building on the results of Activity 1.2 - Monitoring food waste in schools, which provided a comprehensive baseline of food waste levels and contextual factors, this deliverable outlines the planned interventions, methodologies, and success factors for the PA to be implemented in the participating countries. Each partner country has defined its PA according to local school systems, catering arrangements, and food waste profiles, ensuring both contextual relevance and transferability across Central Europe. This deliverable presents the planned activities including objectives, methodologies, tools, stakeholder involvement, timelines, milestones, and success factors.

	By providing a structured concept for pilot actions, Deliverable 1.3.2 serves as a blueprint for implementation (Activity 1.4 - Implementation of food waste prevention pilot actions for schools). It ensures that interventions are evidence-based, participatory, and comparable across countries, while also allowing for adaptation to national and local contexts. PREV 1 awareness-raising interventions in schools will be explored in the Czech Republic, Hungary, Italy, and Poland. In the Czech Republic. This will include e.g. educational and practical activities including cooking workshops, participatory co-creation sessions, poster and leaflet campaigns PREV 2 food optimisation interventions in schools will be explored in Austria and Poland, although in most countries, school meal portions are, to a greater or lesser extent, regulated. Optimisation will include measures such as portion size reduction PREV 3 nudging interventions in schools will be explored in Austria, the Czech Republic, Italy and Poland. This will include e.g. promotion of soup and vegetable consumption PREV 4 Food Redistribution Activities include an array of initiatives and involve several actors like Food Banks and charitable organisations and will be explored in Austria, Czech Republic and Hungary
PA timing (start and end date)	05/2025 - 11/2025
Stakeholders involved	Interventions were developed through a participatory and co-creation process, involving municipalities, catering companies, school management, teachers, parents, students, and other relevant stakeholders.
Joint cooperation dimension (within the partnership)	Pilot Actions are planned together within the whole partnership and will be tested in at least 2 partner countries to ensure transferability and scalability
