#EU GREEN WEEK

Partner Event

Investing in nature via Circular Green Public Procurement

Interreg CENTRAL EUROPE

Co-funded by the European Union

CE-PRINCE

A reuse inventory for climate neutral and circular construction

What: A school was to be demolished. The municipality never made a reuse inventory before.

Good practice by the City of Lund (SE)

More info: https://www.interregeurope.eu/good-practices/reuse-inventory-started-work-with-climate-neutral-circular-construction

This publication has been developed within the CE-PRINCE project, supported by the Interreg CENTRAL EUROPE Programme with co-financing from the European Union. Its content is the sole responsibility of the authors and the project partnership and does not necessarily reflect the views or positions of the Interreg CENTRAL EUROPE Programme, its programme bodies or the European Union. Neither the programme authorities nor the European Union can be held responsible for any use that may be made of the information contained herein.

How: Despite only 2 months before the demolition, 20 stakeholders made the inventory together.

Evidence of success: The experience led to changes in internal procedures & to tenders to promote material reuse.

The first inventory saved EUR 30,000 –40,000 and ~1600 tonnes of brick were reused. (CO_2 savings weren't calculated)

Lessonslearned

- A digital tool is needed.
- A storage is needed.
- Start the inventory at least six months in advance.
- Establish good systems to ensurea smooth transitionof materials.
- Assign a responsible person withthe right expertise.
- Involve stakeholders and continue engagement through seminars.

Whereare we now?

- Plan for climate

  neutralbuidlingand
  constrution
- New tender criteria
- New routinefor
  reuse inventories
  Digital tool
- Physicalstorageand
- reuseorganisation
  is developing

Impacts on circular procurement

- Waste reduction criterion
- Flexibility criterion
- Minimum percentage of reused material
- Maximum climate impact
