Interreg CENTRAL EUROPE — Co-funded by the European Union

RehAllianCE

Thank You for Being Part of the RehAllianCE Journey!

As we share our fifth and final newsletter, we would like to thank everyone who has followed and supported RehAllianCE throughout the project. Your interest and engagement have been greatly appreciated!

Innovating the rehabilitation care system

READ MORE

ABOUT THE PROJECT:

Rehabilitation is care that helps people get back or improve abilities necessary for their daily life.
The challenge is that such care often lies with the family without much systemic or technological support. The RehAllianCE project helps MedTech companies break through and accelerate the commercialisation of their products.

The project partners share experiences and good practices to develop a set of policy recommendations to improve the health care sector's innovation governance. They will test new technologies, such as rehabilitation robots or exoskeletons, assistive devices, wearables or telemetric tools.
